

LIFE GUARD ADDITIVE

Q.1) What is the composition of Life Guard Additive?

- **Life Guard Additive** consists of micro particles of modified zeolite.

Q.2) What is the Mechanism of Action?

- **Life Guard Additive** facilitates selective adsorption of ethylene which is a catalyst for ripening of fruits and vegetables.

Q.3) How is Life Guard Additive superior to others?

- Due to high surface area, it offers high life.

Q.4) Method of Use

- The recommended dosage of **Life Guard Additive** is **20 %** for master batch in LLDPE, PS, PBT or other polymers.
- The recommended dosage of this master batch in polymers is **1-2%**.

Q.5) Can Additive addition in the product change its basic properties?

- It will not change the basic properties of the product.

Q.6) What is the shelf life of Life Guard Additive?

- Life Guard Additive has two years of shelf life from the date of manufacture under dry condition of storage at R.T.
