

## RODENT REPELLENT ADDITIVE

Q.1) What is the composition of Rodent Repellent Additive?

- **Rodent Repellent Additive** is micro porous acrylic polymer, filled with odoriferous substances disliked by rodents.

Q.2) What is the Mechanism of Action?

- **Rodent Repellent Additive** contains odour emitting chemicals unaccepted by rodents. This dissuades rodents from biting the polymers containing Rodent Repellent Additive.

Q.3) How is Rodent Repellent Additive superior to others?

- **Rodent Repellent Additive** is a micro-porous polymer filled with mixture of odor emitting chemicals and very bitter compounds.
- These chemicals are effective at very low concentrations and are harmless to humans.

Q.4) Method of Use

- The recommended addition of **Rodent Repellent Additive** is **10 %** for master batch in PP, LDPE or other polymers.
- The recommended addition of **this master batch** is **2- 3%** for domestic cables and **3%** for industrial cables and drip irrigation cables

Q.5) Can additive addition in the product change its basic properties?

- It will not change the basic properties of the product.

Q.6) What is the shelf life of Rodent Repellent Additive?

- Rodent Repellent Additive has two years of shelf life from the date of manufacture under dry condition of storage at R.T.
